

ASSIGNMENT 3

1. Provide **3 ideas** of applications you want to build for your final. For **EACH** idea, provide the following:
 1. Description of the app
 2. Feature list and time estimate for **EACH** feature
 3. Competitors and their App Store links
 4. Proposed revenue model and reasoning
2. Develop an iOS app that does a calculation and has the following requirements:
 - All previous requirements from assignment 2
 - Has a Dictionary or Array and UI displays the contents
 - Has an additional class that only handles the list of data

Requirements:

All submissions must be in PDF, committed to your Github repository and shared with BSUMobileDev

Due:

September 17, end of day
